📁 Professional Experience

Senior Staff Engineer June 2021 - Present

INIZIO EVOKE

- ▶ Leading the migration and technical architecture transitioning client web products to React / Next.js with reusable components, decreasing development time and increasing performance
- ▶ Led the architecture and delivery of a global Drupal component library, standardizing UI/UX across 3 clients and reducing development time for new features
- ▶ Spearhead the technical strategy and modernization of software solutions across diverse stacks, including **React, Astro, AEM, Drupal, and Node.js**
- ▶ Engineered high-performance **Sling Servlets** and custom **WordPress plugins** to facilitate seamless data integration for mission-critical enterprise backend services
- ▶ Orchestrated a large-scale migration of legacy **Node.js services to LTS versions**, eliminating security vulnerabilities and reducing runtime overhead
- ▶ Architect and develop proprietary technology solutions for client needs
- ▶ Partner with Design and Product leadership to translate complex business requirements into scalable technical roadmaps
- ▶ Simultaneously own and manage technical tasks across a variety of technical stacks
- ▶ Mentor developers in:
 - React Component Development
 - Typescript
 - NextJS
 - Node.js
 - Git
 - AWS Architecture
 - AEM Component Development
 - Drupal Component Development
 - CMS platform upgrades

Tech Partner/Supervisor January 2018 - January 2019

MELTMEDIA

- ▶ Collaborated with Project Managers on tasks for developers under supervision
- ▶ **Directed sequential AEM platform upgrades (6.1 to 6.5)** with zero downtime, ensuring platform stability and unlocking critical enterprise features.
- ▶ Maintained AEM Backend and ensured seamless deployment to AEM Platform

Senior Front End Developer August 2016 - June 2021

MELTMEDIA

- ▶ Architected and delivered custom web solutions for high-profile clients, consistently meeting aggressive deadlines and exceeding performance benchmarks.
- ▶ Automated complex Drupal deployments via AWS CDK, reducing manual intervention and increasing deployment frequency
- ▶ Championed internal education by designing and teaching JavaScript masterclasses to the engineering department.
- ▶ Mentored developers in:
 - AEM Component Development
 - Drupal Component Development
 - AWS Architecture
 - Angular Development
 - Git
- ▶ Wrote custom applications to enhance website functionality
- ▶ Led the development of a proprietary **email deployment platform**, streamlining client communication workflows and reducing third-party tool costs.
- ▶ Mentored a team of developers in AEM component architecture, Angular development, and AWS cloud fundamentals.

Front End Developer December 2011 - August 2016

MELTMEDIA

- ▶ Delivered custom, responsive web solutions for a diverse portfolio of clients, ensuring cross-browser compatibility and SEO optimization.
- ▶ Collaborated within Agile teams to translate high-fidelity designs into interactive, accessible user experiences.

Front End Developer Intern July 2011 - December 2011

MELTMEDIA

- ▶ Supported the development of client-facing websites and HTML emails, gaining foundational expertise in CMS integration and front-end performance.
- ▶ Worked on client and internal technology solutions
